SNYDER TAKES TWO OF THREE GAMES—HOME BOYS TOO SURE OF THIRD

While Big Springs doesn't boast of having a good base ball club, and Snyder does, nevertheless the Big Springs boys were invited for a three game series, Monday, Tuesday and Wednesday, and we enjoyed having them very much.

Big Springs has a fine bunch of gentlemanly young fellows in their club and it is always a pleasure to have men of this kind with us.

Dallas, Texas, July 12.—The body of Frank Holt, assistant of J. P. Morgan, was buried in Oak Hill cemetery in Dallas late today. Rev. J. P. Munnell, of Fort Worth delivered the sermon at the grave. The funeral procession was composed of but few carriages.

However, a large number of the friends of Rev. O. P. Sensabaugh, Holt's father-in-law, congregated in the cemetery with floral offerings from friends of Mr. Holt and Dr. Sensabaugh.

Holt's body arrived in Dallas by express and attracted little attention.

The body of Holt was taken directly from the railroad station to a local undertaker's establishment. Later in the day the casket was opened and the body was viewed by Mrs. Holt and other members of the Sensabaugh family. Except for a slight facial disfigurement, it is said that the features appeared natural.

Members of the Methodist Episcopal Church, South under whose auspices the funeral services were conducted, acted as pall bearers. Their pastor, former Mayor R. J. Day, of Dallas and Portioner B. M. Durkee.

SCURRY COUNTY COTTON PROSPECT

Scurry county had 55,000 acres of cotton last year and more 30,000 bales. The acreage this year is estimated at 25 per cent less, or approximately 45,000 acres. The crop has been cultivated much better this year than was possible last year, and men who have been over the country say the general condition of the cotton is about as good as it was at this time last year.

STOCK KILLED BY HOPPER POISON

Dozens of the fattest stock of many are quelloled by red-tail hawks at once, helpless and put to a terrible death in their efforts to escape the agricultural pestilence, and it is estimated that more than half a million cattle have died since the

invasion of the eastern states by the grasshoppers. The pestilence has spread to the western states, and the losses are estimated at \$100,000,000.
